

BUSSELTON VETERINARY HOSPITAL - BUSSELTON WA

ABOUT THE BUSINESS

Busselton Vet Hospital is a Veterinary practice and Hospital with a commitment to providing the highest possible veterinary care in a friendly and compassionate environment.

THE REQUIREMENTS

With energy intensive medical facilities, electricity usage is around 100kWh per day. With rising power costs in WA, Busselton Vet Hospital wanted a cost-effective solution that would reduce business expenses.

THE SOLAHART SOLUTION

Solahart South West WA provided reliable and high-quality service in the past, which gave Busselton Veterinary Hospital the confidence to work with Solahart on a bespoke commercial PV system. A Solahart PV system was custom engineered to deliver over 13kW of power, using 47 x 280-watt REC TwinPeak polycrystalline panels together with an optimal sized SMA inverter.

TESTIMONIAL

"Having experienced the reliability and service of Solahart hot water both at work and home gave me the confidence to discuss my solar power requirements with this reputable and longestablished company. I was most impressed by the professionalism and communication through the whole process; all this wrapped up in a genuinely friendly and happy team."
