

# HIGH-EFFICIENCY PANELS. WORLD-LEADING INVERTERS.

## Q CELLS PANELS

### Features

- ✓ Outstanding Panel Performance
- ✓ Superior panel performance in low light and high temperature
- ✓ Anti-reflective glass technology
- ✓ Smart design and reliable components

### How you benefit

- ✓ More power for same roof space
- ✓ Maximises the amount of power generated in varying conditions
- ✓ Each panel collects more sunlight
- ✓ Reduces effect of degradation to ensure reliable ongoing energy generation

## FIMER (ABB) INVERTERS

### Features

- ✓ Designed and built in Italy with world leading inverter transformer-less technology
- ✓ Aurora Vision Cloud-based monitoring
- ✓ Multiple MPPTs (Maximum Point Power Tracker) for flexible design

### How you benefit

- ✓ Improved inverter efficiency so you get more usable power from your system
- ✓ Monitor system performance online, from your PC or device
- ✓ Enhanced energy harvesting, even in situations with shade

## SOLAREEDGE INVERTERS

### Features

- ✓ Module-level optimisation
- ✓ Full system visibility
- ✓ Optimiser safety protection
- ✓ Cloud-based monitoring platform

### How you benefit

- ✓ Flexible System design to yield improved energy outputs
- ✓ Module-level monitoring, reducing operation and maintenance costs
- ✓ Improved safety of installation and operation
- ✓ Monitor system performance online, from your PC or device

# SMART SOLAR POWER SOLUTIONS FOR SMART BUSINESSES

# REDUCE YOUR ENERGY BILLS AND CREATE A MORE SUSTAINABLE BUSINESS

At Solahart, we're proud to be leading the solar revolution, one business, one solar panel at a time. Every day, we're helping smart businesses cut their energy bills and make a real difference to the planet. It's time to join the revolution. It's time to get smart with Solahart.

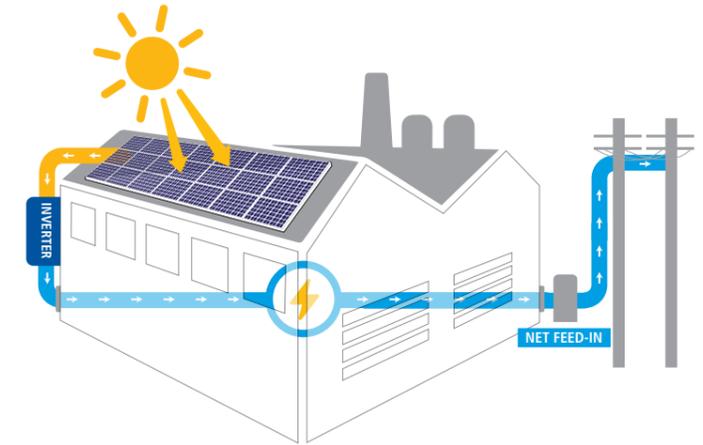

# COMMERCIAL SOLAR POWER THAT'S UNRIVALLED FOR QUALITY

Solahart Solar Power systems deliver unrivalled quality, performance and efficiency. By bringing together world-renowned Q Cells Panels and a high-performance inverter range, you can be assured that you have a commercial solar power system that is second to none.

## How it works for your business

- Photons from the sun are turned into electricity by solar panels
- DC current is converted into 240V AC electricity via an inverter for use by your business.
- A meter measures the amount of electricity your solar system produces
- Any unused AC power may be sent back to the grid subject to network approval

# WHY SOLAHART SOLAR POWER IS THE SMART CHOICE FOR YOUR BUSINESS

## Australia's solar experts

Since 1953, Solahart has been Australia's solar pioneer. And now, as the solar revolution ramps up, we are still leading the way with smarter technology to help businesses soak up more energy from the sun. As the trusted name in solar, we always take the time to understand our customers' needs. We still believe in face-to-face contact to better understand your unique situation, review your energy bills and inspect your building.

Our solar power systems are only available through authorised Solahart dealers and our professional installers are fully trained to Solahart's exacting standards. For extra peace of mind, we're also accredited by the Clean Energy Council. And thanks to our proprietary Savings Estimator, we can give you an indication of how much you could save, so you can be sure you're making a smart decision.

## Unrivalled quality and testing

All Solahart Solar Power systems are designed and manufactured for the harshest Australian conditions. Before we include any new component in our range, it is rigorously tested to ensure minimal energy losses, maximum energy yields and strength over the life of your system. From the glass, to the frames, laminates, electronics and roof-mounting systems, when you choose Solahart, you're choosing the best of the best.

## Greater efficiency and performance for greater savings

Because of their superior efficiency and performance, Solahart Solar Power systems deliver amazing savings to your business and are a great way to reduce electricity bills. And by using a renewable energy source like solar, you'll be making your business cleaner and greener.

## Trusted Solahart Warranties

With over 65 years experience and over 1 million systems installed, Solahart is here for the long haul. Every Solahart system is backed by a trusted Solahart warranty. And in the unlikely event of a problem, you can rest assured that a Solahart smart energy expert will be there to fix it.

## Competitive leasing options

If you want to enjoy the immediate benefits of going solar with no deposit and an affordable repayment schedule to minimise the impact on your cash flow, ask about our competitive range of leasing options.

## Generous government incentives

Generous government incentives, in the form of Small-Scale Technology Certificates (STCs) and Large-Scale Generation Certification (LGCs) are available to help reduce the purchase price of your new system and, together with your energy savings, could significantly improve your return on investment.

## Powerful Fimer (ABB) Inverters

Fimer (ABB) inverters are powerhouse performers in the commercial solar space. Their highly efficient energy conversion ensures maximum performance even under extreme ambient conditions, offering a reliable and self-sufficient supply of energy free from the sun.

6 MPPTs (Maximum Point Power Trackers) provide optimised and flexible design options.

Optimised at module level for improved performance

## Module Optimised SolarEdge Inverters

SolarEdge entered the commercial inverter market with their range of module-optimised solutions. This technology enables superior power generation and performance monitoring at module level, providing incredible system design flexibility and improved safety. These additional features are making systems more popular in large scale commercial and industrial installations.

## Award Winning Q Cells Panels

The harsh Australian environment demands quality solar power components. That's why we use world-leading Q Cells panels which are consistent with Solahart's quality and performance requirements. Q Cells panels are also a great choice for the environment.

Q.ANTUM DUO Half cell technology improves energy yields

Split panel design enables independent energy generation for improved performance in shaded conditions

Reduced framed edges to avoid dirt and moss build up

Anti-reflective glass technology collects more sunlight
